Communities of Opportunity Displacement Risk Assessment

Tiernan Martin, Futurewise

Introduction

The primary geographic unit of this assessment is the census tract. As is the case with many communities, the census geographies do not coincide exactly with the formal geographic boundary of the study’s three sites, and should be considered as *spatial approximations* of these communities.

Listed below are the geographic identifiers of the census tracts that approximate each site.

Table 1: Census Tract GEOIDs

Rainier Valley	White Center	SeaTac
53033010001	53033026600	53033026200
53033010300	53033026700	53033027300
53033010401	53033026500	53033028000
53033011001	53033026801	53033028100
53033011002	53033026802	53033028300
53033011101	53033027000	53033028402
53033011102	NA	53033028403
53033011700	NA	53033028500
53033011800	NA	53033028700
53033011900	NA	53033028801
NA	NA	53033028802
NA	NA	53033029101
